A diverse group of civilian and military leaders of all ranks have joined forces to improve the Civil Affairs Association’s communications.

The team is proud to announce the new Eunomia Journal. Learn about the symbolism here.

We are building momentum and expanding our readership. Some of the most popular articles come from our members… we need more!

Here is a brief review of the content we seek:

**Warrior-Scholar Corner.** These pieces can range from 1000 – 4000 words. Dust-off your monograph or thesis and compress it to fit within this range with appropriate citations. We will work with authors to publish in Eunomia Journal or other publication outlets.

**Article Posts and Announcements.** The sweet spot for these high-frequency posts is 500 – 1000 words. Tell a story about your team’s deployment, make an announcement of a change of command, or highlight a special event.

**Excellence from Across the Force.** The CA Association has the smartest, most operationally-savvy, and highly-competent members in the military and interagency. From winning competitions to special awards or any other stories to brag about our members. Share them with us here.

**Team Room.** A venue that offers 500 - 2,000 word articles that address contemporary issues, highlights best practices, or offers solutions to common issues for those serving in an operational battalion or below. This is the spot to address leadership challenges, pre-mission training tips, or anything else that may benefit others currently serving!

**Veteran Benefits.** Have you recently transitioned into retirement and discovered important lessons that could be shared with other members? Write a short post (500-1000 words) to publish in this section. There are so many benefits out there that the port-retirement operational environment can be difficult to optimize. Help shine light on any hot deals or programs that can help other members.

**Job Opportunities.** We routinely get a variety of organizations looking for CA talent. Those opportunities will be posted in this section. It will also feature Units seeking to fill open positions.
